

Advanced LCD/OLED Display Driving Solution

Introduction

The Advanced OLED Display Driving Solution provides high performance video quality and a variety of analog panel interface, which can drive different analog LCD or OLED panel quickly by using different firmware. The SOC design makes it cost-effective and meets time to market with less peripheral components and completed development tools.

Features

- Support Composite/ S-Video/ Component/ CCIR-656 Video Input
- Support Internal 4 Color OSD
- High performance of Video quality
- Support OLED (up to 4.3 inches) Panel
